Software Engineer

Pittsburgh based Identified Technologies is the fastest growing drone mapping and analytics company on the east coast and we're hoping you'll join our expanding team. Inc, TechCrunch, NBC, and CNN have recognized us for transforming job site management. Our integrated drone mapping solution takes care of everything from FAA compliance and flight planning, to advanced data analysis and insights. You push the start button on the drone and we take care of the rest.

We help companies in construction and earth moving save time, money, and lives with 3D job site data and analytics. We empower ENR 400 companies, including Amec Foster Wheeler, Carmeuse, Casella, Edgerton, EQT, Kokosing, and Vulcan and with the ability to track progress on construction, highway excavation, well pads, mines and landfills in near real-time. Do you have relevant professional experience and a passion for what we're creating? We hope you'll join our fun, fast growing startup team as we take flight!

Responsibilities & Values:

Our cross-functional product development team works closely together to provide our customers with valuable insight into their operations.

We are looking for a software engineer who:

- leverages technology to solve challenging problems
- appreciates maintainable and well tested code
- enjoys participating in the entire software lifecycle
- is passionate about delighting customers and is driven by their success
- loves to refine their craft through exploration and collaboration of ideas
- embraces process automation with an eye toward continuous integration/delivery

Experience & Qualifications:

We understand that not all experience will directly match our present tech stack. If you are a good fit and have a strong desire to learn, we'd still love to talk to you!

- Software generalist with full stack web application experience
- Server-side frameworks and tools: NodeJS, SailsJS, and Python
- Front-end frameworks and tools: EmberJS, ReactJS, Bootstrap, and SCSS
- Mobile application development: Android and Java
- Relational databases: PostgreSQL
- Platforms and tools: AWS, Linux, and Docker

Applications/Questions? Please e-mail your resume and any representative work you'd like to highlight (e.g., GitHub, LinkedIn, projects, talks, etc.) to careers@IdentifiedTech.com with the subject line "Software Engineer – Lastname, Firstname". Learn more @ IdentifiedTech.com
